

Managed Services for Business Central

Keeping your finance, operations and other business critical processes reliable, updated and optimized.

What do we offer

Leveraging Microsoft Dynamics 365 Business Central is a strategic way to create core business benefits, process harmonization, increased level of automation, end-to-end visibility and offer digital services that set your business apart. But it also requires you as a business to maintain & develop those apps and processes. That involves keeping them updated, secure and reliable as well as having the right knowledge and approach to keep optimizing and developing them with relevant features.

We work hand-in-hand with you to achieve just that, keeping your goals and users in mind. We call it Connected Managed Services with strong services within Success Management, Business Continuity and Business Optimization.

The benefits

- Assured daily continuity with minimal business process interruption through monitoring, proactive actions based on information received from monitoring, and a structured process for handling incidents with a dedicated team.
- Resilience by ongoing proactive work with roadmap and insights into future updates and technological developments focusing on the implications for your Business Central solution and environment.
- Improved user experience through analysis of incidents and behaviour leading to ongoing suggested improvements.
- Create more business value and realize your ambitions and goals by leveraging our skilled Fellows and insights for the ongoing development.

 **Microsoft**
Solutions Partner
Business Applications

In short, we call it **continued value creation!**
